Illuminate your brand

LED Edgelit Signage

Draw attention where you need it most.

There are lots of sign companies out there. Why is Carmanah Signs different?

Because

- We're about understanding your brand well.
- We're about using our medium to deliver your message.
- We're not just selling signs - we provide visibility.
- We support your brand with our materials, our design and our "always on" approach.

Our signs boast a slim profile that is not only contemporary, but also add value for the space it doesn't use. Something else our signs don't use? Mercury, High Voltage and Excess packaging.

Sure, our lights are always on. They're LEDs. They don't break or need replacing every couple of months and they don't consume loads of energy. We use LEDs because they deliver bright, consistent illumination. When a potential customer views a sign showcasing your brand we make sure the lights are on.

We know eco-responsibility is part of your mission. Let your signage reflect that.

- LEDs have long lamp life
- LEDs are reclaimable
- Housings are 100% recyclable
- Safe 12V electrical system
- No maintenance required
- No bulbs to change
- Minimal packaging used

Our team is committed to your success

Communicate Value, Eco-Responsibility and Durability

Working with us is like having your own sign department. Think of us as an extension of your organization. We look after design concepts and think about retail implementation. We care about timelines. We even take care of logistical and shipping support.

Digital Components Available

Display a dynamic message on one of Carmanah's updatable displays

- Countdown Clocks
- LED Scrolling Messages
- Numerical Digit Displays
- LCD Screens

And more can be embedded directly into a Carmanah Sign allowing your message to be up to date, functional and bright.

Think *Green* Go *Green*

Safe, 12-volt Design • Ultra-long LED lamp life • No bulbs or tubes to replace means less waste
